

# **Biotechnology: Science for the New Millennium**

## **Table of Contents**

Chapter 1	What is Biotechnology?
Chapter 2	The Raw Materials of Biotechnology
Chapter 3	The Basic Skills of the Biotechnology Workplace
Chapter 4	Introduction to Studying DNA
Chapter 5	Introduction to Studying Proteins
Chapter 6	Finding a Potential Biotechnology Product
Chapter 7	Developing Assays for Biotechnology Products
Chapter 8	Modeling the Production of a Recombinant Biotechnology Product
Chapter 9	Bringing a Biotechnology Product to Market
Chapter 10	Introduction to Plant Biotechnology
Chapter 11	Biotechnology in Agriculture
Chapter 12	Biotechnology in Medicine
Chapter 13	Making DNA Molecules
Chapter 14	Advanced Biotechnology Techniques

# Biotechnology: Science for the New Millennium

## Table of Contents

### To the Student: Be a Part of the Biotechnology Revolution

Chapter 1	What is Biotechnology?	
1.1	What is Biotechnology?	1
1.2	Doing Biotechnology: Scientific Methodology in a Research Facility	9
1.3	The Variety of Biotechnology Products	14
1.4	How Companies Pick Potential Products	19
1.5	Who does Biotechnology? Careers in the Biotechnology Industry	26
1.6	Biotechnology with a Conscience – Bioethics	30
	End of Chapter Materials	37
Chapter 2	The Raw Materials of Biotechnology	
2.1	The Raw Materials of Biotechnology	50
2.2	Cellular Organization and Processes	56
2.3	The Molecules of Cells	63
2.4	The “New” Biotechnology – Manipulating Molecules	74
	End of Chapter Materials	77
Chapter 3	Basic Skills of the Biotechnology Workplace	
3.1	Measuring Volumes in a Biotechnology Facility	84
3.2	Making Solutions	93
3.3	Solutions of a Given Mass/Volume Concentration	96
3.4	Solutions of a Given % Mass/Volume Concentration	99
3.5	Solutions of Differing Molar Concentrations	101
3.6	Dilutions of Concentrated Solutions	105
	End of Chapter Materials	111
Chapter 4	Introduction to the Study of DNA Molecules	
4.1	DNA Structure and Function	124
4.2	Sources of DNA	129
4.3	Isolating and Manipulating DNA	140
4.4	Using Gel Electrophoresis to Study Molecules	145
	End of Chapter Materials	153
Chapter 5	Introduction to the Study of Protein Molecules	
5.1	The Structure and Function of Proteins	164
5.2	The Production of Proteins	172
5.3	Enzymes: Protein Catalysts	178

5.4	Studying Proteins	184
5.5	Why Study Proteins?	188
	End of Chapter Materials	194
Chapter 6 Finding a Potential Biotechnology Product		
6.1	Sources of Potential Products	202
6.2	The Use of Assays	208
6.3	Looking for Products in Nature	211
6.4	Studying Plant Proteins as Possible Products	216
6.5	Producing rDNA Protein Products	221
	End of Chapter Materials	226
Chapter 7 Spectrophotometers and Assays for Biotechnology Products		
7.1	Using the Spectrophotometer to Detect Molecules	236
7.2	Introduction to pH	243
7.3	Buffers	246
7.4	Using the Spectrophotometers to Measure Protein Concentration	249
	End of Chapter Materials	255
Chapter 8 Modeling the Production of a Biotechnology Product		
8.1	Producing a Genetically Engineered Product	262
8.2	Transforming Cells	269
8.3	After Transformation	278
8.4	Fermentation, Manufacturing, and GMP	283
8.5	Retrieving Plasmids after Transformation	288
	End of Chapter Materials	294
Chapter 9 Bringing a Biotechnology Product to Market		
9.1	Harvesting a Protein Product	303
9.2	Using Chromatography to Study and Separate Molecules	308
9.3	Column Chromatography	314
9.4	Product Quality Control	320
9.5	Marketing and Sales	323
	End of Chapter Materials	329
Chapter 10 Introduction to Plant Biotechnology		
10.1	Introduction to Plant Propagation	336
10.2	Basic Plant Anatomy	342
10.3	Plant Growth, Structure, and Function	347
10.4	Introduction to Plant Breeding	351
10.5	Statistical Analysis of Data	359
	End of Chapter Materials	368

Chapter 11	Biotechnology in Agriculture	
11.1	Cloning Plants	381
11.2	Cloning by Plant Tissue Culture	386
11.3	New Applications of Biotechnology in Agriculture and Horticulture	390
11.4	Isolating DNA from Plant Cells	395
11.5	Plant Genetic Engineering	399
	End of Chapter Materials	405
Chapter 12	Biotechnology in Medicine	
12.1	Drug Discovery	415
12.2	Creating Pharmaceuticals through Combinatorial Chemistry	420
12.3	Creating Pharmaceutical through Peptide or DNA Synthesis	423
12.4	Creating Pharmaceutical by Protein/Antibody Engineering	427
	End of Chapter Materials	432
Chapter 13	Making DNA Molecules	
13.1	Making DNA Molecules - DNA Synthesis	437
13.2	DNA Synthesis Products	444
13.3	Polymerase Chain Reaction - PCR	449
13.4	Applications of PCR Technology	454
	End of Chapter Materials	461
Chapter 14	Advanced Biotechnology Topics	
14.1	Advanced DNA Topics – DNA Sequencing	468
14.2	Advanced DNA Studies – Genomics	475
14.3	Advanced Protein Studies	479
14.4	Other Advances in Biotechnology	489
	End of Chapter Materials	494
